We've compiled a list of the best resources for everything onion. This site is not about that. Write an introduction to an informative and factual blog post titled "The 37 Best Websites to Learn Something New". Forget overpriced schools, long days in a crowded classroom, and pitifully poor results. These websites and apps cover myriads of science, art, and technology topics. They will teach you practically anything, from making hummus to building apps in node.js, most of them for free. There is absolutely no excuse for you not to master a new skill, expand your knowledge, or eventually boost your career. It will only take a few hours of your time and with the help of these websites, you'll be an expert in no time. Make a list of your favorite sites, courses, and applications. Add a description to each one explaining what they do and why you like them. Do you enjoy solving complex puzzles? Are you an inventor? Do you think outside the box? Then this site is for you. It's a treasure trove of original mind-teasers, with a new one added every day from December 1 to December 31. They're not all that easy but if anyone can solve them it's this guy. You wake up one day and find out that your computer is missing. That's what happened to me. I found myself in a situation where I had no access to my computer and no idea how to get it back. Luckily, the Internet came through for me and became my desktop for a while, helping me solve all sorts of problems and gain new photographic skills and knowledge. The people of Hack a Day went through the trouble of making tutorials on how you can use Linux or Mac OS X to get around not having a computer of your own. When you're done with each tutorial, there is an option to download them for later use. The site also has a wiki and a place to share your own tips. If you need to use a computer without one, I recommend this site. If you ever wanted to learn how to make cool things with electricity, this is the place for you. You can find all sorts of tutorials on how to make robots, lasers, ham radios, and many other items here. Electrical engineering is the study of electro-magnetic phenomena related to electricity. Find out more about it here! Have you ever wondered what would happen if you could combine the powers of Iceman from X-Men with the powers of Aquaman from DC Comics? Well wonder no more because WonderHowTo shows us how. Join the team and learn absolutely amazing things. Be prepared to be amazed. We all use Google search to find movies, recipes, games, and many different things online. Google is great for finding your answers to questions that are relatively easy to answer because you search for exactly what you are looking for. However, it can be very damaging when you are looking for facts to back up what you are saying or learning about something new. The Internet is full of facts that do not reflect reality because people post them without doing any research to make sure they are valid or validating them through other sources. YouTube "Dunning-Kruger Effect".
